Subject: '10 PCI Convention & fib Congress - Registration Open

PCI Convention & 3rd International *fib* Congress – An Investment in Your Future!
May 28 – June 2, 2010, Washington DC

When you think of the PCI Convention partnered with the 3rd International *fib* Congress, one word comes to mind – Opportunity! The Congress couldn't be more important than during these challenging economic times. Some people feel this is the time to cut back, and reduce, when actually it's the opposite. This is the time to invest and take advantage of rare opportunities that can make a difference in your future.

Here are just a few of the reasons to attend and be apart of this unprecedented event:

- **State-of-the-Art Technical Knowledge - The Experts are Speaking** – Over 500 technical peer-reviewed papers, from over 45 countries will be presented during the Congress. These papers address almost every facet from design and analysis to materials and field operations.
- **Education and Professional Development** – beyond the technical sessions, there will be dozens of education sessions where experts will present on marketing, finance, sustainability, business management, operations, and more.
- **Networking When You Need it Most** – At this one event will be literally a "whose-who" from the world-wide concrete industry. There is no better place, or time, to meet and talk with industry experts, old friends and build new relationships that can last a lifetime.
- **Exhibition Hall of Opportunity** – The 100,000 sq. ft. exhibit hall will be packed with over 100 exhibitors from around the globe showcasing their latest innovations and products. Come find the technology, product or service that can make a difference in your bottom line.

Event and hotel registration are Now Open. Go to <http://www.pci.org/> and click on the "fib/PCI Convention" icon or go to www.fib2010washington.com. Take advantage of early bird discounts and register today!

For questions and more information about the event, visit www.fib2010washington.com or contact Colin Faul, at cfaul@pci.org.

We look forward to seeing you in DC!
